Exquisite Fiber Fine Art by SVETLANA TUROV

Svetlana Turov is an emerging Canadian Artist based in Burlington, Ontario. Her primary medium is Fiber Fine Art.

Inspired by her family's traditions which were passed down through generations of women she also decided to dedicate her life to work with felt. It happened that her main teacher was great-grandmother who showed Svetlana wet felting and explained the healthy advantages of this technique and materials. After a long while of investigations and research Svetlana decided to redevelop family traditions with contemporary materials and appearances.

She has developed an amazing unique style, crafting pieces that bear resemblance to traditional paintings while possessing almost 3D surfaces. Beside that, Svetlana's works have the highest textile quality and durability.

A few years ago she established her own website under the name "sFeltLana," combining her name and the art of Felting. Using various wool, silk, fleece, and felting techniques, she meticulously crafts each unique piece with the aim of reflecting the beauty and serenity of nature while minimizing the impact of human activities on the environment.

Svetlana's artistic process involves meticulously layering wool and silk fibers to construct intricate and durable artworks. Influenced by the serene beauty of the ocean, seashore, and the natural world, her creations evoke a sense of tranquility and romance. The warmth and eco-friendliness of her artworks add to their allure, making them ideal additions to contemporary interiors.

Svetlana's portfolio predominantly features pieces inspired by the ocean, saltwater, breezes, sails, and the majestic Niagara Falls.
